

OpenScape Desk Phone IP Family

Vibrant, relationship-building conversations

A cutting edge, user friendly family of phones that amplifies team performance and radically reduces admin and support costs.

Stay connected, responsive and collaborative in any situation.

Social media, instant messaging, video, email and web chat. Today's business conversations are happening everywhere. But there's no substitute for voice - so the desktop telephones you choose matter.

Complex interfaces, lengthy sign-on and poor voice quality all impact productivity; in the contact center, reception or in your busy workspace.

We're breaking down these barriers - giving you the tools to instantly, securely and reliably hold relationship-building conversations.

Available in two versions - OpenScape Desk Phone IP 35G for your standard telephony, and the 55G for your power users - the devices are beautifully engineered with a small footprint that optimizes your limited workspace.

OpenScape gets you talking

- Streamline low value tasks and supporting power users through instant access to high demand features
- Rapidly on-board new employees with our easy to use interface and delightfully simple set up
- Connect your anywhere workers by moving mobile calls to the desk phone and back again - with settings, histories and status available anywhere
- Secure your calls without any impact on user experience, call quality or management
- Eliminate communications bottlenecks with in-built Gigabit Ethernet and UC application integration.

And thanks to AudioPresence™ HD voice technology, staying in touch has never sounded so good.

It's happening right here

Breaking down conversation barriers on the desktop.

Easy to use and with advanced features, OpenScope Desk Phone IP 35G is in a class (and a price) of its own.

OpenScope Desk Phone IP 35G

Ideal for contact centers and knowledge workers, the OpenScope Desk Phone IP 35G is packed with everything you need to stay connected to colleagues and customers - from flexible headset support to multi-line conferencing options.

It's flexible for any location: with a small foot print, tilt positioning, programmable keys and wall mountable options out of the box.

It's ready for today and tomorrow: with seamless network integration and in-built Gigabit Ethernet.

It's designed for users: with an ergonomic build and high demand features at your fingertips.

It's available anywhere: with a range of mobile integration and call swiping functions.

And it's plug and play: with centralized device management and instant set up reducing your administrative costs and resource burdens.
